Ponnampet, Kodagu District, Karnataka, India – 571216

Career Objective

Motivated and detail-oriented Artificial Intelligence & Data Science undergraduate at Coorg Institute of Technology, passionate about building intelligent, real-world systems at the intersection of Machine Learning, Data Analytics, and Full-Stack Development. Actively seeking internship opportunities to apply expertise in AI-powered applications, secure systems, and campus technology solutions to solve meaningful problems. Eager to contribute as a proactive team member, grow through hands-on industry exposure, and deliver impactful AI-driven solutions.

Education

Coorg Institute of Technology

B.E. in Artificial Intelligence & Data Science | Final Year (4th Year) – Ongoing

Halligattu, Ponnampet, Karnataka

Aug. 2023 – Jun. 2027

Projects

Campus Resource Orchestrator (CRO) | React, Node.js, Python, MongoDB, Chart.js, REST APIs

2026

- Architected a sustainability-focused energy and resource management dashboard for Indian college campuses, providing real-time monitoring of electricity, water, and waste metrics across departments.
- Built a predictive analytics module using historical usage patterns to forecast resource consumption and surface actionable recommendations, targeting 15–20% reduction in campus energy wastage.
- Designed an admin control panel with role-based access, alert thresholds, and automated report generation — replacing manual log-keeping workflows across 5+ campus departments.
- Presented at Nexora inter-college hackathon; recognized for impact-driven design and scalability of the resource orchestration architecture.

Developer Portfolio Website | React, TailwindCSS, Vite, Framer Motion, Vercel

2025

- Designed and deployed a fully responsive personal portfolio with smooth scroll animations, project showcases, and a contact form — achieving a clean, professional aesthetic without templates.
- Leveraged Vite for near-instant builds and optimized asset bundling; deployed on Vercel with automated CI/CD, achieving 95+ Lighthouse performance score across all metrics.
- Implemented a reusable component architecture with clean separation of concerns, enabling rapid addition of new sections with minimal code duplication.

Secure Password Generator & Analyzer | Python, Flask, JavaScript, HTML/CSS, NIST SP 800-63B

2024

- Built a cryptographically secure password generator grounded in NIST SP 800-63B standards, using Python's secrets module and Shannon entropy algorithms to produce high-entropy, breach-resistant passwords.
- Engineered a real-time password strength analyzer that evaluates entropy bits, character diversity, and known-breach exposure — providing instant, actionable feedback to guide users toward stronger credentials.
- Designed an intuitive security UX with visual entropy meters, copy-to-clipboard functionality, and configurable policy rules (length, symbols, exclusions) — ensuring the tool feels handcrafted rather than generic.

Hospital Management System (HMS) | Python, Flask, MySQL, SQL

2024

- Developed a full-featured hospital management system to handle patient records, appointments, doctor schedules, and billing workflows — significantly reducing manual administrative overhead.
- Designed a normalized relational database schema in MySQL with role-based access for doctors, nurses, and admins, ensuring data integrity and secure multi-user record management.
- Implemented Flask REST API endpoints and built dynamic frontend views for patient intake, discharge summaries, and real-time inventory tracking across departments.

Data Analytics Dashboard | Tableau, Microsoft Excel, Python, Pandas

2024

- Built an interactive data visualization dashboard in Tableau to analyze trends and derive actionable insights from large datasets, enabling data-driven decision-making for non-technical stakeholders.
- Performed end-to-end data wrangling and EDA using Python (Pandas, NumPy) and Excel — cleaning, transforming, and aggregating raw data before loading into Tableau for visual analysis.
- Designed KPI-focused dashboards with filters, drill-downs, and calculated fields — reducing manual reporting effort and presenting complex metrics clearly to business audiences.

Technical Skills

Languages: Python, JavaScript, SQL, C
Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Streamlit
AI / Data Science: Scikit-learn, Pandas, NumPy, Matplotlib, Machine Learning, NLP Fundamentals
Frontend: TailwindCSS, Vite, Framer Motion, HTML, CSS
Databases: MySQL, MongoDB, PostgreSQL
Cloud & DevOps: Git, GitHub, Vercel, Docker (Basics), VS Code
Data & Analytics Tools: Tableau, Microsoft Excel, Google Colab

Certifications & Virtual Experience Programs

Deloitte Australia Data Analytics Job Simulation	Jul. 2026
Completed practical, simulated workplace tasks in data analysis and forensic technology — issued via Forage.	
Tata Data Visualisation: Empowering Business with Effective Insights	Jul. 2026
Completed hands-on tasks in framing business scenarios, choosing and creating effective visuals, and communicating data-driven insights — issued via Forage.	
NASSCOM FutureSkills Prime Exploratory Data Analysis	Jul. 2026
Completed a MeitY-NASSCOM aligned course on structured exploratory data analysis techniques and industry standards.	
GUVI x HCL India AI Impact Buildathon – AI Impact Summit 2026	Feb. 2026
Among 40,000+ participants nationwide; engaged in AI-focused build challenges covering model deployment, responsible AI, and real-world problem framing at the national summit.	
Infosys Springboard Data Science – Course Completion Certificate	Nov. 2025
Completed structured online curriculum covering data wrangling, exploratory analysis, supervised learning models, and model evaluation techniques.	
AICTE IDEA Lab IDEATHON 2025 – Certificate of Appreciation (State Level)	Nov. 2025
Recognized at state level at New Horizon College of Engineering, Bengaluru for innovative problem-solving as part of Team Phoenix; engaged in structured ideation and prototype evaluation.	
ME-RIISE Foundation UI/UX Hackathon – PRAGYATHA'25 (National Level)	Nov. 2025
Participated in a national-level UI/UX hackathon at Malnad College of Engineering, Hassan; designed user-centric interfaces and presented end-to-end UX solutions to an industry jury.	
EYSEC Cyber Security Solutions Cyber Security Implications & Defences – AICTE Approved	Sep. 2024
Completed certification on cyber threat landscape, network defence, and ethical hacking fundamentals; scored 99.50% — awarded by Dept. of AI & DS, CIT, Ponnampet.	
CIT Centre of Excellence for Robotics I/O Interfacing with Embedded Systems – Workshop	May. 2024
Participated in a 6-Day hands-on workshop in collaboration with Indian Tech-Keys, Bengaluru, covering microcontroller interfacing, sensor integration, and real-time I/O programming.	

Achievements

Nexora Hackathon Coorg Institute of Technology	2026
Presented Campus Resource Orchestrator (CRO) at the inter-college Nexora hackathon; project selected for its real-world impact in campus sustainability and resource optimization.	

Extracurricular Activities

Yukthi Technical Event VTU Regional Centre, Mysore	2026
Competed in Yukthi, a VTU-organized inter-college technical symposium at the Regional Centre, Mysore, engaging in competitive problem-solving events and collaborative technical challenges.	

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief. I take full responsibility for the accuracy of all details mentioned herein.
